

The Pearson children work books are fantastic. I used them both as a teaching tool (to assist what I am teaching) and an independent or group activity. They are bright, colourful and easy to read. The children always get excited when they get to use the books. The teacher's guide is simple, easy to follow and makes clear links. An all-round great resource.

Nicole Jamieson

We love the independent activity cards. The children use them as task board activities and then once a week we set them up as a class rotation and they get to do the activities with other children that they don't usually work with. It's fantastic to see them supporting and teaching each other and they love the freedom of being able to do it by themselves.

Ngaio Dalton

The activity cards are so easy to use and I can always quickly find whatever activity I need to back up my teaching. They are fun and bright and the children love them. I also really enjoy the monthly newsletters. I find them really inspiring and we have had many discussions as a staff over the topics in them.

Fiona Kenderdine.

I am in year 3 and have just bought my own Pearson Maths Textbook. I really like doing the maths at home and Mum and I sometimes do it together. She knows what I am doing at school and she helps me and I can write in the book. It is cool to show my sister stuff in it too.
